# Nike's Supply Chain

NIKE

Third party **manufacturer**

Nike **distribution center**

**Wholesale partner**

**Retail**

591 in the world.  
Most of the production  
relies in Asia Pacific (52%  
of the footwear and 92%  
of the apparel).

67 around the world.  
2/3 of the revenues  
come from EMEA and  
North America.

20 000 in the world.

110 000 in the world.

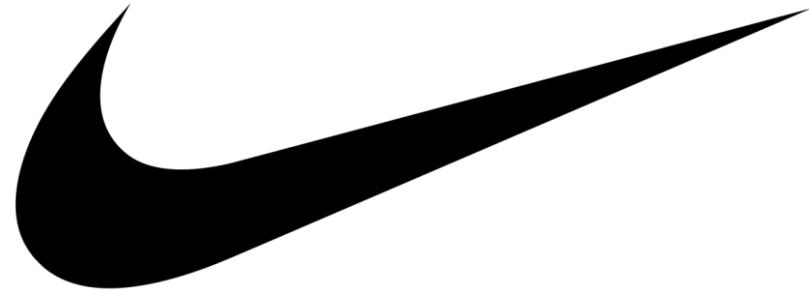

\* Products need to first be designed, approved, tested & prototyped

**Recommendation  
systems**  
("Frequently bought  
together")

**Forecasting**  
(Inventory)

**Optimization**  
(Stocking, workload)

**Supplier selection**  
(performance)

**Dynamic pricing**  
(real-time adjustments)

**IoT**  
(customer insight)

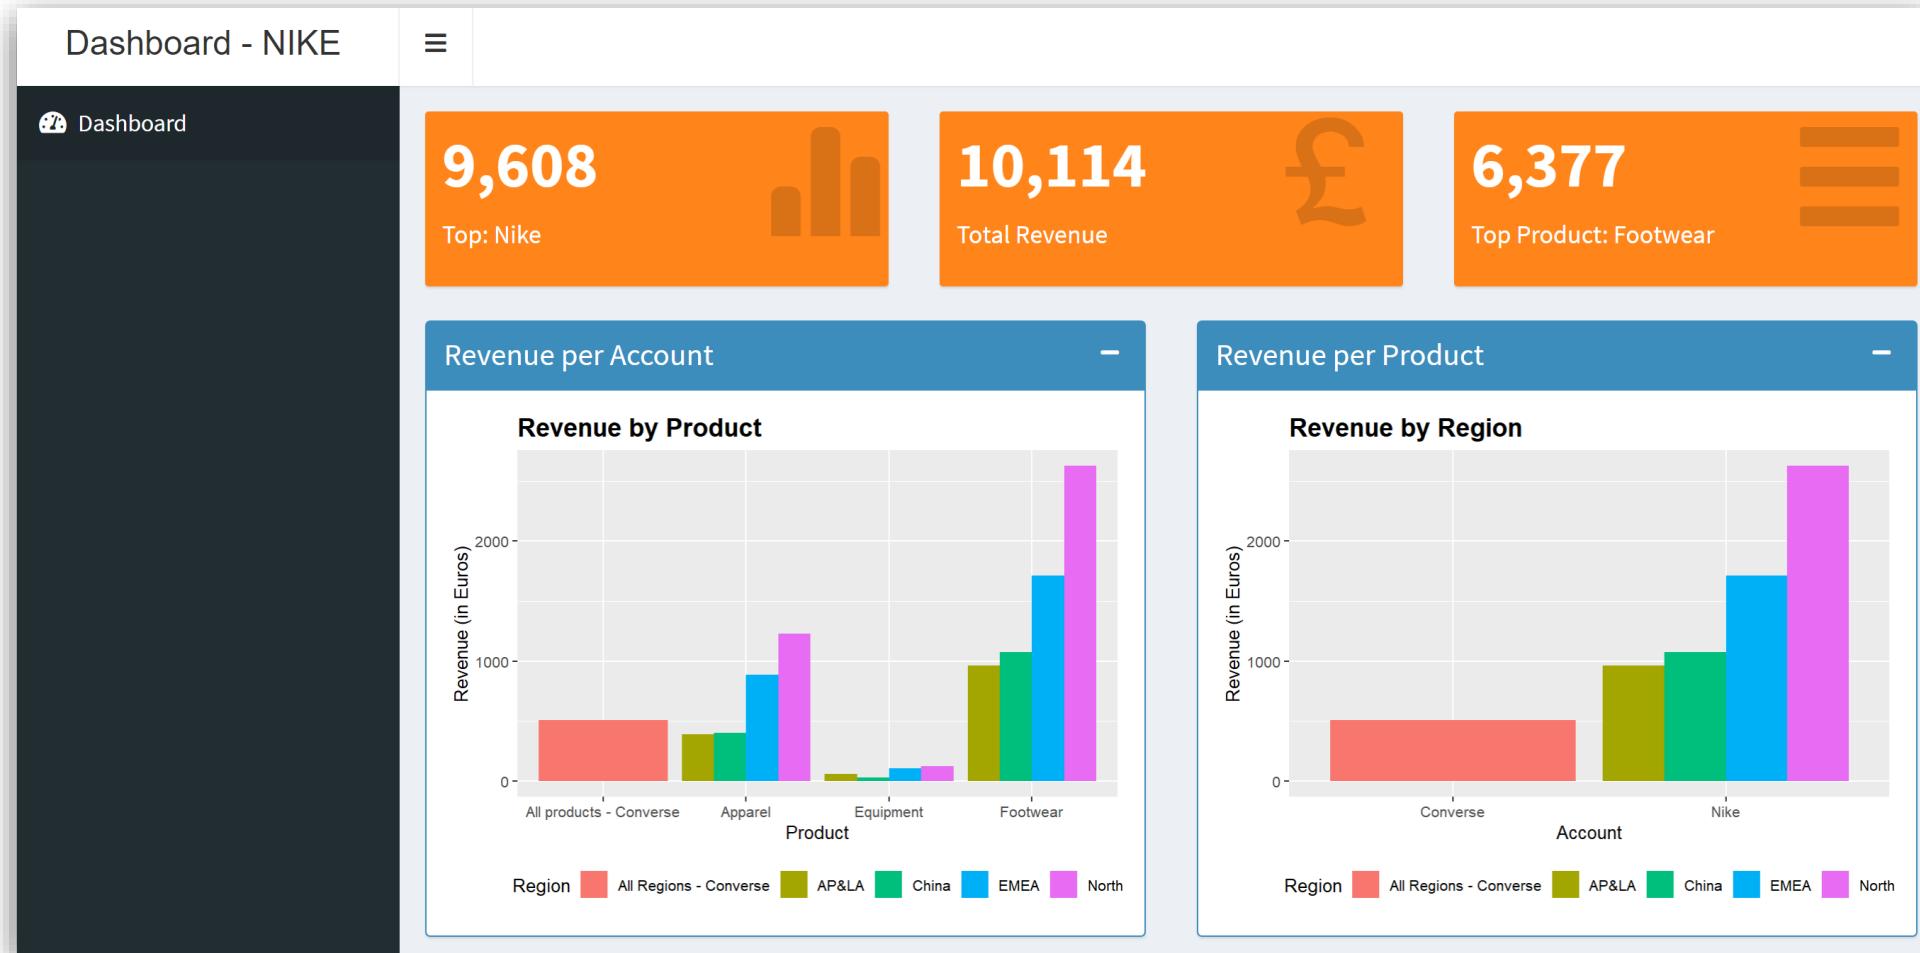

**Real-time analytics**  
(sales, inventory)

\* 2017 objectives: Quickly restocking, customer insights (on materials) from concept stores, new products in half a time.

# Basic Real-Time Dashboard

DASHBOARD

**Perfect Order Measurement**

**Freight bill accuracy**

**Inventory Turnover Ratio (ITR)**

**Cash to Cash Cycle Time**

**Freight cost per unit**

**Turn-Earn Index (TEI)**

**Customer Order Cycle Time**

**Inventory Turnover**

**Gross Margin Return on  
Investment (GMROI)**

**Fill Rate**

**Days Sales Outstanding**

**Days of Supply (DOS)**

**Supply Chain Cycle Time**

**Average Payment Period for  
Production Materials**

**Inventory Velocity (IV)**

**Inventory Days of Supply**

**On Time Shipping Rate**

## Current Calculation

**Analyst's salary:** EUR 2 880

**Per hour:** EUR 16

**Time spend:** 3 hours weekly

**Time per year:**

3 hours \* 4 weeks \* 12 months = 144 hours

**Money:** 144 hours \* EUR 16 = **EUR 2304**

## Real-time dashboard

**Analyst's salary:** EUR 2 880

**Per hour:** EUR 16

**Time spend in development:** 15 hours

**Time per year:** 30 hours

**Money:** 30 hours \* EUR 16 = **EUR 240**

**Saving: EUR 2064**
